STEPHANIE FOSKITT

Buffalo, NY 14203 • (716) 416-8602 • Stephanie.Foskitt@gmail.com

Summary

Hardworking software engineering professional with 12 years experience. Ready and motivated to find the next challenge.

Objective: Make outstanding contributions on an outstanding team creating outstanding products.

Work History

Senior Software Engineer, 03/2022 to 09/2024

Cox Automotive – Burlington, VT

- Developed an ETL pipeline to filter 800,000 records per month using Snowflake, AWS services and Vertica
- Modified the monolithic back end service to accommodate the 10 new endpoints required to query and retrieve the new ETL data
- Wrote Terraform code required to create the AWS infrastructure for the ETL
- On-call support and debugging for the existing Kubernetes containers running on AWS EKS
- Led the team migrating an existing Confluent data pipeline to AWS Kafka pipeline
- Contributed to conversion from Jenkins CI/CD to GitHub Actions by writing actions and workflows for 6 repositories

Software Engineer II, 04/2017 to 02/2022

Bizrate Insights, a Meredith Company – Los Angeles, CA

- Back end microservice and API development in Java with Spring (2020-2022)
- Front end development with React (2017 – 2020)
- Heavy AWS infrastructure development in EC2, CodeDeploy, S3, Lambda, API Gateway, CloudFormation and more
- Maintenance of existing services and scripts in Python
- Familiarity with Zeppelin, Airflow, SonarQube and more
